Natalia Sobrino
Research fields:
Transportation Climate change mitigation and adaptation Energy Efficiency Carbon footprint Road transport Vehicular emission models Assessment methodologies in transport Mobility surveys and mobility patterns
natalia.sobrino@upm.es

Robert Ziolkowski
Research fields: road traffic safety, traffic management, analysis of speed and drivers' behaviour
robert.ziolkowski@pb.edu.pl

problems of road engineering, micro traffic safety issues.
Currently I am working (or preparing to work) on research projects focused on multicriteria assessment of intersections and road structures, etc...
jan.hradi@fsv.cvut.cz

Alborz Davoodi
Research fields: Islamic and Persian Architecture and History of Architecture
alborzdavoodi@pnu.ac.ir

Mohammad Imran Hossain
Research fields: Pavement materials, Structural engineering, Finite Element Method modeling and Transportation Engineering
mohammadihossain.1@gmail.com

S. M. Sohel Mahmud
Research fields: Road safety & Injury Prevention; Accident Prediction Model and Statistical Analysis, Sustainable Transport & City Planning; Land use and transportation planning; Traffic control and management, Geographic Information System (GIS), etc..
smsohelmahmud@gmail.com

Dr. Erika Beilicci
Research fields: hydrology, water resources management, soil erosion, sediment transport, environment protection
beilicci_erika@yahoo.com

Silvia Brunoro
Research fields: sustainable refurbishment, energy efficiency and innovation of technologies and materials
brnsiv@unife.it

Aida Azari Sisi
Research fields: Strong ground motion data processing; Strong ground motion database compilation; Seismic damage assessment of structures; Generation of fragility curves for structures; Stochastic simulation of earthquake catalog, etc..
aida.sisi@metu.edu.tr

Jia Hu
Research fields: Sustainable/green building; Building energy and simulation; Building information modelling (BIM); Life cycle assessment (LCA); Computer application in construction; Computer modeling of built systems (e.g., envelop) etc..
jia.hu@philips.com

Valentina Cristini
Research fields: Preservation, Vernacular or Monumental Architecture, Traditional Constructive Techniques and Raw Materials (i.e. brickworks, rammed earth walls, masonries, lime& gypsum mortars etc.)
vacri@cpa.upv.es

S.B.Malekzadeh
Research fields: 1.Tunneling operation; 2.Geological issues related to tunneling operation; 3.Geotechnical investigation; 4.Instrumentation and monitoring operation; 5.Risk analysis of tunneling operation; 6.Mining operation; etc..
