

## Site Design Engineer

If you are studying in **Civil Engineering** we offer the next step for you to build a career in Exciting Telecom Technologies.

**Huawei Romania** is inviting you to be part of our family.

### What you'll do:

- Provide technical solutions for design related projects (wireless networks, site construction; knowledge of optical fiber networks is a plus);
- Complete the technical design and documentation for different projects related to wireless networks, according to customer requirements and each project specifications (e.g.: design using specialized software/ technical memo/ bill of quantity/ order proposal/ connection diagrams);
- Complete the quality check and acceptance of the on-site installation works (comparing the works with the design and the bill of quantity, checking the quality of the works according to operator's standard and making the final assessment).

### What you'll need:

- Bachelor degree in the field of Constructions, Engineering;
- Basic knowledge of Telecommunications field (radio networks and/or optical fiber);
- Including equipment, technologies and network configuration is a must;
- Experience with technical site solution related activities in the Telecommunication's field is a plus;
- Good knowledge of English language (both written and spoken) is mandatory;
- Knowledge of German language (both written and spoken) **is a plus**;
- Additional language (eg. French, Spanish) **is a plus**;
- Good knowledge of design software – CAD and/or GIS (eg. AutoCAD, QGIS, ArcGIS);
- Knowledge of Microsoft Office package (Excel, Word, PowerPoint and Visio).
